葉家舟 Prof. Chia-Chou Yeh

職稱 Official Title

院長

單位 Department

三義慈濟中醫醫院

Speech Title

演講主題

Plannign Research on Traditional Chinese Medicine Databases

如何規劃中醫資料庫研究

Abstract 摘要:

In recent years, due to the development of information technology, the Internet and information technology have been widely used in various fields, including the field of medical information. Through this study, two systems were established to help doctors quickly find possible answers to the problems they encounter in clinical situations. The main purpose is to establish a medical literature collection and analysis system. It uses the search interface provided by the medical literature organization to retrieve all medical literature data. After collecting and analyzing the data, the system recommends which documents doctors can read first, which can reduce the number of doctors. Time to collect and read information.
