	Official Title	Professor of Medicine, Director of Cardiac Imaging
	Department	Cardiovascular Medicine

Speech Title	COVID-19 era: The Value of Cardiac MRI in Patients with Suspect Myocardial Injury
Abstract(200 words) :	<p>In the COVID-19 era, cardiac MRI imaging with parametric mapping is emerging as the imaging modality of choice in patients with suspected myocardial injury. SARS-CoV2 associated acute myocarditis is often associated with troponin elevation, symptoms, and/or cardiac dysfunction. Ischemic findings can also be found in patients with troponin elevation and cardiac risk factors. Clinical and subclinical myocardial imaging abnormalities after recovery from SARS-CoV2 have also been reported. The long-term effects of these findings warrant further study.</p>
